

Core Overview

Purpose

The **Core Overview** dashboard provides a centralized summary of system resources, user activities, server performance, and available system modules. It helps administrators monitor system health, user access, and overall ERP platform status.

Dashboard Components

1. Active Users

Type

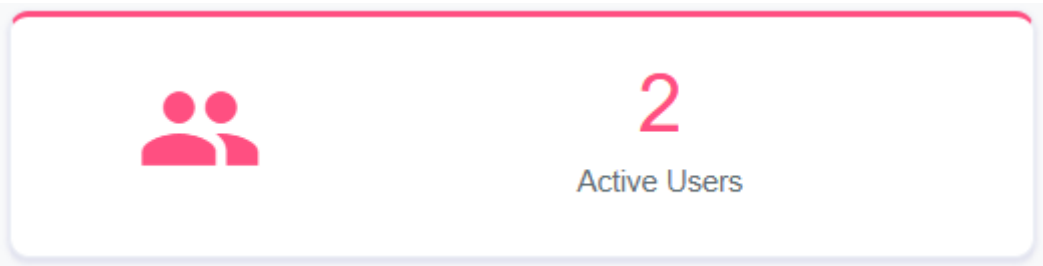

- KPI Card

Description

Displays the total number of active user accounts in the system.

Purpose

Monitor the number of users currently registered and authorized to access the ERP system.

2. Active Branches

Type

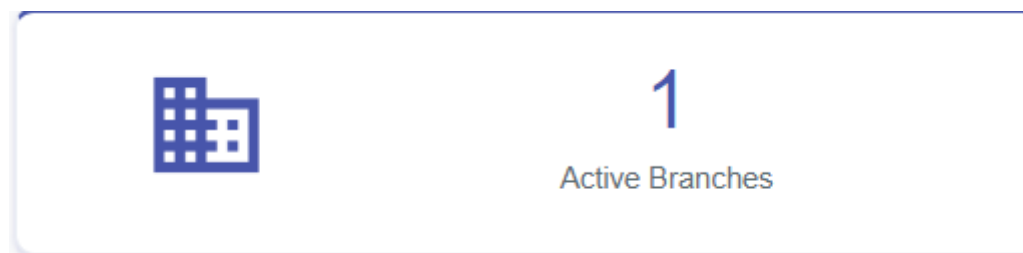

- KPI Card

Description

Displays the total number of active company branches configured in the system.

Purpose

Provide an overview of operational branches currently using the ERP system.

3. Active Modules

Type

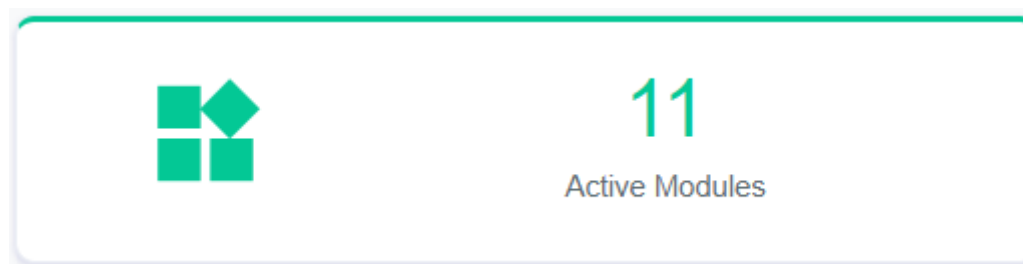

- KPI Card

Description

Displays the total number of enabled ERP modules.

Purpose

Show the available functional modules currently activated for the organization.

4. Server Load Status

Type

- System Status Panel

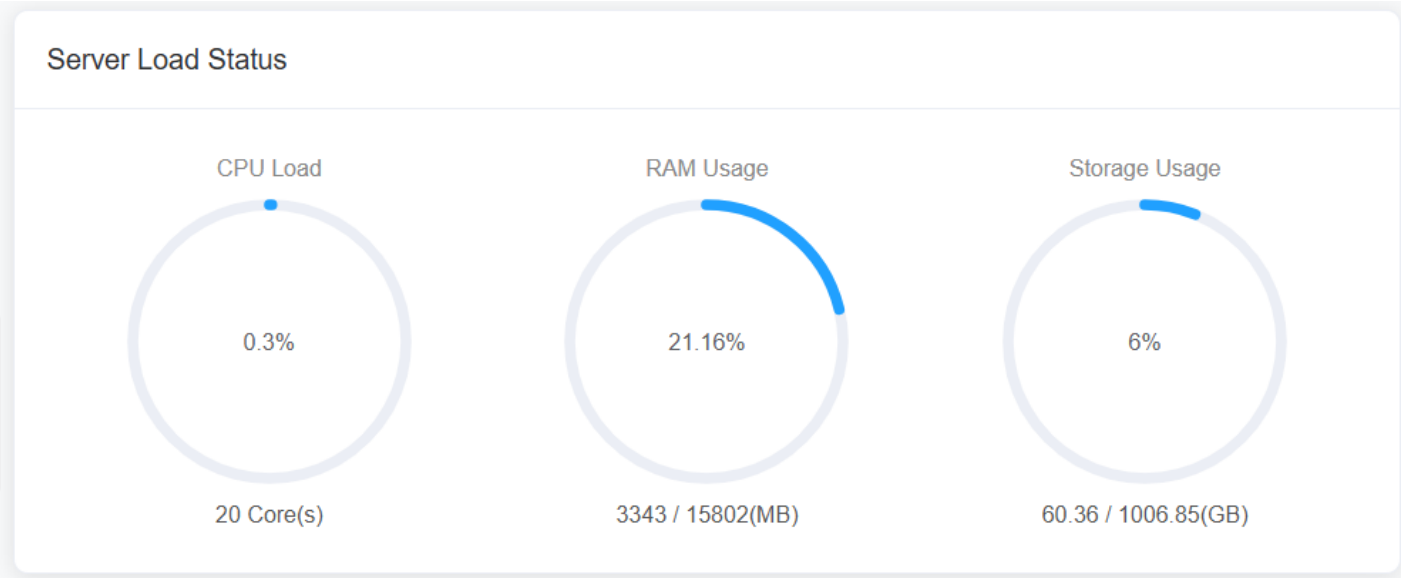

Display

Displays the current server resource utilization, including:

- CPU Load
- RAM Usage
- Storage Usage

Purpose

Monitor server performance and ensure sufficient system resources for stable ERP operation.

5. Storage Summary (GB)

Chart Type

- Pie Chart

Display

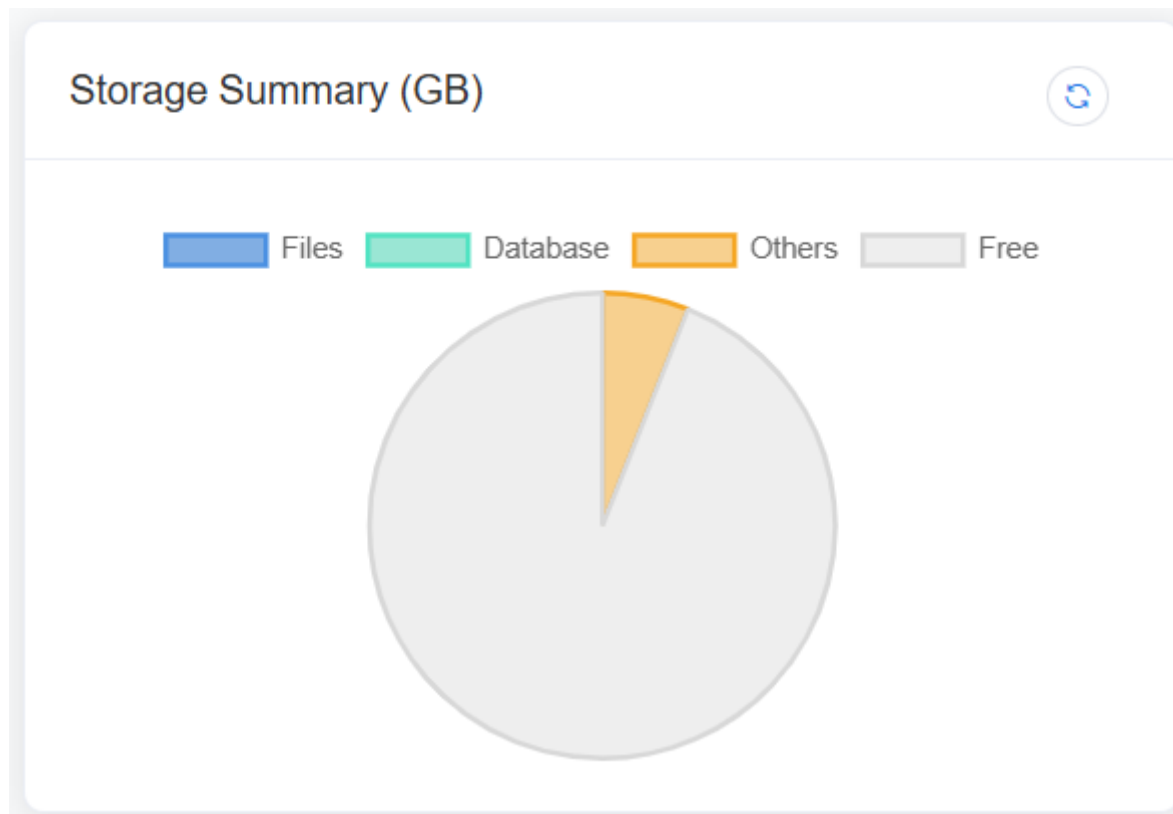

Storage allocation categorized by usage.

Example:

- Files
- Database
- Others
- Free

Purpose

Visualize how server storage capacity is distributed across different data categories.

6. User Activities

Chart Type

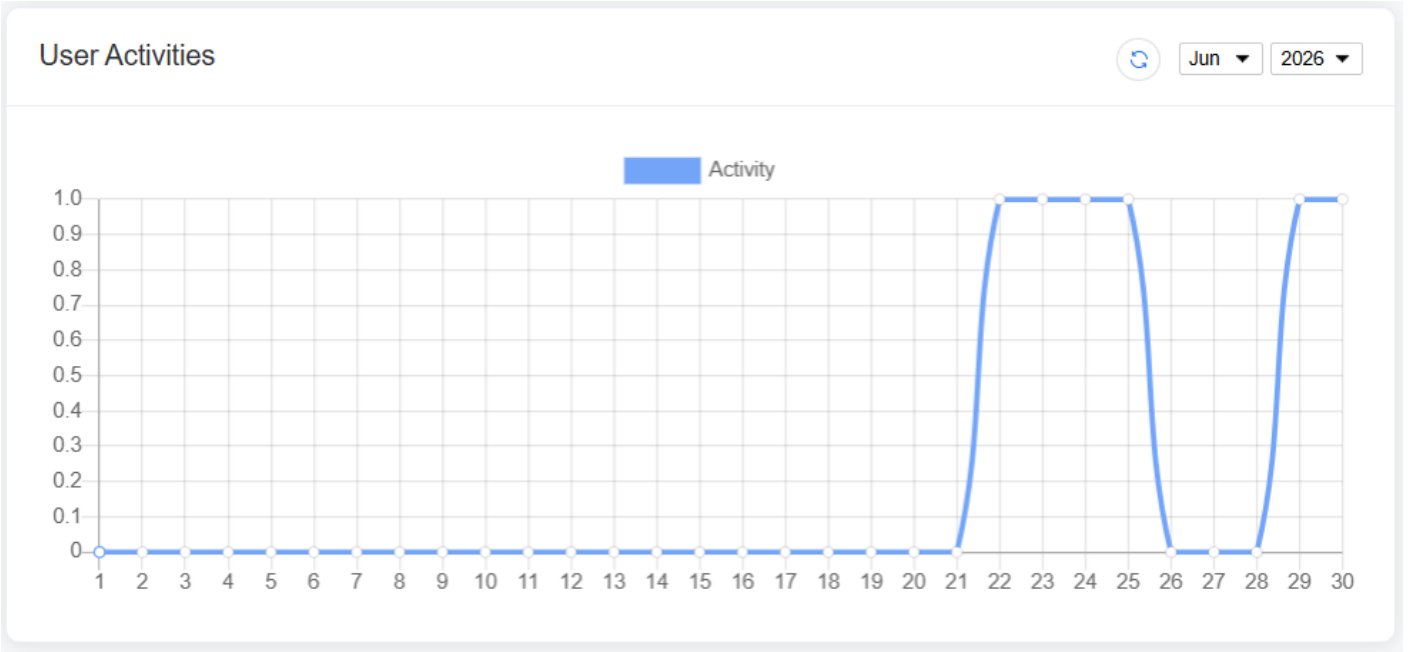

- Smooth Line Chart

Display

Shows user activity trends over time, such as daily or hourly login and system usage.

Purpose

Monitor user activity patterns and identify peak system usage periods.

Activity Tables

7. Last 20 Sign In Activities

Displays the latest 20 user login records.

Column
No.
Username
Date
Time

Purpose

Track recent user login activities for system monitoring and security auditing.

Last 20 Sign in Activities

No.#	Username	Date	Time
1	master	30/06/2026	09:12AM
2	master	29/06/2026	08:56AM
3	master	25/06/2026	09:22AM
4	master	24/06/2026	11:11AM
5	master	23/06/2026	09:51AM
6	master	22/06/2026	10:44AM

8. Available Features / Modules

Displays all ERP modules currently available to the user or organization.

Example Modules:

- Core
- EmployeeHub
- Payroll
- Reporting
- Bookkeeping
- Inventory
- Purchase
- Sales

Purpose

Provide a quick overview of the ERP modules enabled within the system.

Available Features / Modules

Core

EmployeeHub

Payroll

Reporting

Bookkeeping

Inventory

Purchase

Sales
